

Good afternoon sir

First of all, I would like to thank you for giving me this opportunity to introduce myself.

My name's Vivek rai I'm from Guna, Madhya Pradesh. I'm 31 years old. I have done my schooling 10th and 12th from MP Board. I did my graduation BE(cse) and postgraduate MTech(cse) from same university RGPV. And also, I'm certified java programmer (OCJP).

About my family background:

I belong to joint family. There are 9 members in my family.

My strength is, I am a multitasking, self-motivated.

My weaknesses are I can't say no when someone asks me for help.

My short-term goal is to get a job in IT company.

My long-term goal is to get knowledge and experience so that I get a higher position in the company and also become successful in life.

My hobbies are travelling, programming, watching birds.

Now comes to why you choose this program

Actually, I was working in E-governance project as district coordinator through third party last five years. My work profile was non-programming field and my job responsibilities and role is not suitable for me according to my education background. I want to switch my career as full stack java developer, that's why I choose this program.
